BSG Team Ventures needs Oxygen for charity run

BOSTON MA, CAMBRIDGE UK: September 24, 2006
BSG Team Ventures was delighted to combine forces with Oxygen Healthcare to participate in the 2006 Chariots of Fire race in Cambridge, UK.

Team Captain Gayatri Shah made the connection:

"I have just joined BSG Team Ventures and am pleased to discover the appetite for community contribution," commented Gayatri "so it was an easy step to combine forces with my husband's company Oxygen Healthcare and pull a team together."

The Chariots of Fire event is in its 15th year and achieved record team numbers in 2006 - 403 teams of 6 runners competing in a relay race covering 1.7 miles per runner racing through the streets and colleges of Cambridge, UK. Sponsorship in aid of The East Anglian Air Ambulance, this year's charity, is expected to exceed all previous years - as usual, for this increasingly popular event.

"My! It is an extreme method of demonstrating the value of training!" puffed CEO Dr Simon Haworth, in pain on the finish line. "But fun, and worthwhile too."

About BSG Team Ventures

BSG Team Ventures is an executive search partnership with offices in Boston, New York City and Cambridge, UK. We specialize in retained search for emerging companies in the US and Western Europe, and do so with a keen appreciation for the unique requirements of entrepreneurial and rapidly growing ventures. BSG Team Ventures offers valuable expertise to both European and American clients as they expand abroad.

Since 1997 BSG Team Ventures principals have been engaged to fill more than 250 senior-management and Board positions at the VP level and above, for a slate of clients that includes venture capitalists and private investors, their portfolio companies, and public companies with a strong commitment to "intrapreneurship" and technology. The majority of these engagements have been in industries and with companies at the cutting edge of innovation -- in

"Team researches in ensure the candidate is fit with the c for the long result is a process and solution concerned."
